Dual rubber heating rollers

The pressure of the rubber rollers is regulated by linear actuators. And two rubber heating roller enable the patterns on film A to be better transferred onto film B.

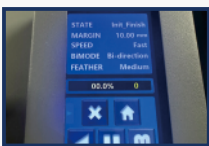

Anti-static brush

A large amount of static electricity will be generated when tearing off the A film. We have equipped anti-static brush to eliminate static electricity, which not only ensures the printing quality but also protects the nozzles.

Head mounting plate

We are committed to facilitating our customers. By using a high-precision processed print plate, there is no need to adjust the angle of the print heads.

Touch-Screen Panel

User friendly touch screen panel ensure smooth and convenient operation,enhancing user's experience and improving work efficiency.
